

TCI is proud to announce the release of the HarmonicGuard® Passive 5% harmonic filter.

The HarmonicGuard Passive, or HGP for short, offers users 5% iTHD performance with a host of additional features to meet most needs, including:

- 5% current THD performance over a wide load range
- Can be configured to operate in environments with background voltage distortion as high as 5%
- 100 kA Short Circuit Current Rating (SCCR)
- Fused branch circuit to protect capacitors
- Generator compatibility
- Available fuse monitor
- Hinged access door
